Summary

Fourth-year Computer Engineering student at MMCOE Pune (SPPU) with a CGPA of 9.33 and interests spanning natural language processing, intelligent data systems, computer vision, and edge-based computing. Built ML-driven applications such as image-to-text generation, transformer-based document analysis, and data-focused prediction systems using Python and modern workflows. Particularly interested in practical AI systems that combine language, vision, and on-device or distributed computing. Currently studying Japanese to broaden linguistic and cross-cultural understanding in computational language research. Adaptable and proactive, with a strong willingness to work on new problem areas, collaborate on research-oriented projects, and continuously learn emerging technologies.

Education

Marathwada Mitra Mandal's College of Engineering, Pune **(Expected June 2027)**

B.E. in Computer Engineering | ***CGPA :- 9.33/10*** *(Cumm. of 5 semesters)*

Relevant Coursework: Data Structures and Algorithms (C++), Programming & Problem Solving (Python), Software Engineering, Principles of Programming Language (Java), Operating Systems, Database Management Systems (DBMS), Human–Computer Interaction (HCI), Computer Networks, Probability & Statistics, Theory of Computation

Suryadutta College of Science and Technology, Pune

Higher Secondary Education | ***Percentage :- 75%***

Relevant Coursework: Bifocal Computer and Hardware

Loyola High School and Secondary Education, Pune

Secondary Education | ***Percentage :- 96%***

Experience

Internship

- **AI/NLP Intern — ConvenioTech Software Systems Pvt. Ltd.** ***Jan -April 2026***
    - Task 1:- Developing a transformer-based document comparison system for aviation regulatory (DGCA) updates using local LLMs. Built an NLP pipeline integrating OCR and PDF-parsing tools to extract and preprocess policy documents, followed by embedding generation and semantic similarity analysis to detect version-level changes. Implemented automated comparison and summarization modules to highlight key regulatory updates and generate concise revision summaries. Focused on domain-specific document understanding and scalable analysis of structured and unstructured regulatory text.

- Task 2:- Engineered a custom, bilingual (German/English) interactive lead-generation chatbot for a German carpentry enterprise, integrating it seamlessly into their WordPress platform. Built the frontend using React, Tailwind CSS, and Framer Motion to deliver a premium UI/UX with dynamic conversation flows for custom window and door inquiries. Developed a secure Node.js/Express backend integrated with the Resend API to process multi-step customer data, handle image uploads, and dispatch dynamically formatted email notifications. Collaborated directly with international stakeholders to ensure precise brand alignment, technical compliance, and a highly optimized customer conversion funnel.

- **Full-Stack Team Lead Intern — URJA Japanese Consultancy Pvt. Ltd.** ***Jan 2026 – Present***

Leading development of MVP for internal workflow system. Designing backend architecture and database structure. Coordinating small dev team and feature planningImplementing core modules across frontend and backend.

Additional Projects

• IEEE Conference Website Development(ICSFT-26) :- Designed and developed a complete website for an IEEE Conference. Managed end-to-end development, including responsive design, content integration, and user interaction modules.

• Patient Management System (Deployed) :- A comprehensive web-based solution for managing patient records, appointments, and administration. Developed and deployed a Patient Management System supporting patient records, appointments, prescriptions, and administrative workflows.

• Smart India Hackathon (SIH) :-

1) Patient Bed Managment (2024):- Created a queue management and emergency bed tracking system to optimize hospital workflows. Focused on real-time updates and user-friendly interfaces.

2) Rooftop Rainwater Harvesting using AR/VR technology (SIH-Intercollege Winner 2025) :- Simulate real-time water flow, storage, and efficiency. Developed an immersive visualization tool to analyze design decisions and improve sustainable water management.

• Parallel Paradox (Gamethon- 2nd Runner-Up Winner):-Developed Parallel Paradox, a Unity-based puzzle game featuring a unique self-cooperative mechanic where players record and replay their actions to solve physics-based challenges. Implemented core gameplay systems, UI, and scene transitions within a narrative-driven environment.

Research Interests

- Natural Language Processing
- Multimodal AI & Vision–Language Systems
- Edge/Distributed AI Systems
- Document Intelligence & Information Extraction
- Applied Machine Learning & Data Analytics

Clubs & Volunteering

- C.O.D.E Club :– Web Developement member.
- Google Developers Groups (GDG) :– Design and Content Head.
- Udaan 2K24 :– Event Volunteer.

Technical Skills

Programming & Core:
Python, C++, Java, SQL, JavaScript

Data & Experimentation:
Jupyter Notebook, Anaconda, model experimentation, data pipelines, embedding generation, document parsing & OCR workflows

Machine Learning & NLP:
PyTorch, Transformer models (local LLMs), scikit-learn, OpenCV, Tesseract OCR, NumPy, Pandas, semantic similarity analysis, text preprocessing

Web & Application Development (Working Knowledge):
React, Node.js, Django, REST APIs, HTML/CSS

Tools & Platforms:
Git/GitHub, Docker, VS Code, Linux (if comfortable), MySQL,Unity

Design & Other Tools:
Figma, Canva, WordPress, Flutter, Android Studio

Certifications :- C++ (MBTB-certification), Java Programming (MBTB-certification),
Machine Learning & MLOps (Udemy), Robotics & Designing (Robominds), Fundamentals of Operating System (NPTEL), Cyber Security and Networking (OPSWAT)

Soft Skills

Analytical Thinking, Research-oriented Problem Solving, Cross-cultural Collaboration, Technical Communication, Adaptability.

Languages

- English - Fluent
- Hindi - Native
- Marathi - Native
- Japanese -Intermediate (JLPT N3 candidate)
